Tenda 3G-611R+ Wi-Fi N

One USB, Many Connections.

The Tenda 3G-611R+ Wi-Fi N router is truly a multi functional wireless broadband router. When connecting a 3G / 3.5G / EVDO USB modem card, all network (wired / wireless) users can share the high speed wireless internet connection. The Tenda 3G-611R+ Wi-Fi N router device has 3 different modes of operation, 3G connection sharing, WiFi Access point or Wifi booster. All these features come standard on the 3G routers from Tenda along with a 4-Port Switch, and Firewall. With a unique multi-language setup wizard you can have your router connected to the Internet within minutes by following the simple setup wizard which is included in the router. The 3G-611R+ is a real multi functional device!
